Datasheet AE900

AE900 has high mechanical strength, heat resistance and good antifriction properties. It's characterized by a low coefficient of friction and good wear properties, unaffected by wet environments. AE900 offers also a good resistance to a wide range of chemicals and many solvents. It is porosity freed and most formulations are approved for contact with food.

Application

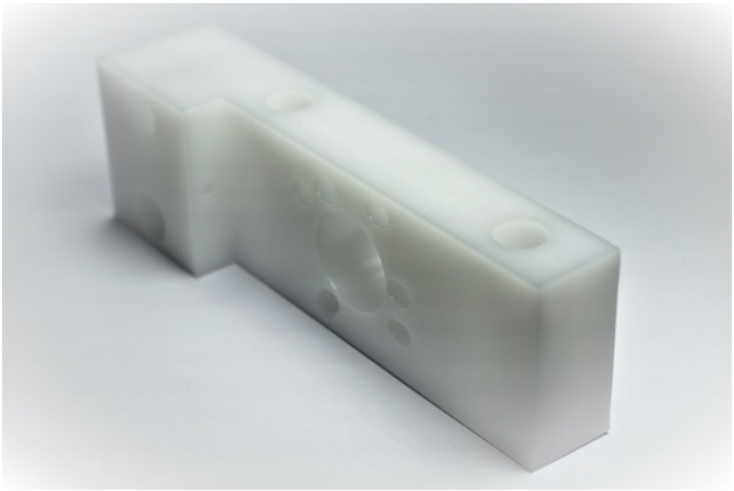

Food processing, agriculture, medical, electric, electronic, automotive, general machine building, transport and logistics, bottle and car washing equipment, sports equipment, office machinery, textile.

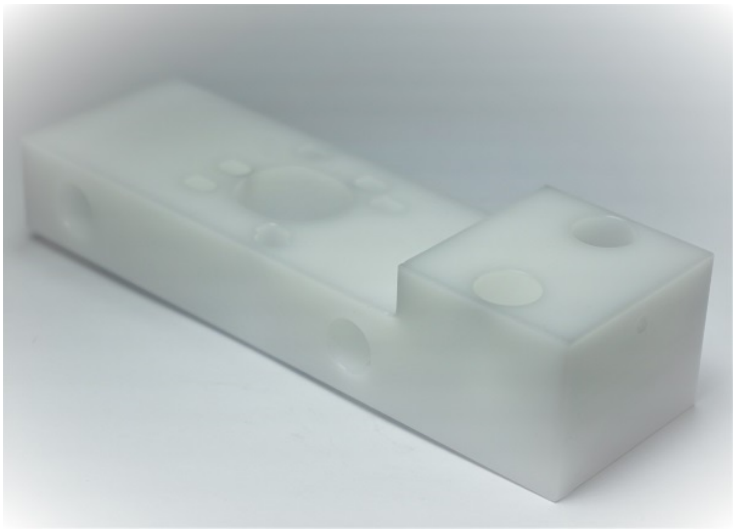

Material

POM-C.
