## Datasheet Pin-On-Disc-and-Oscillating-Tribometer

In accordance with ISO 7148, ASTM G99-95A, ASTM G 133-95. To increase performance and reliability of mechanic parts, companies and universities study more and more friction properties and wear resistance of coatings and bulk materials. To replay to their needs we have developed versatile tribometers, reliable and easy to use.

## Application

Applicable for coatings, bulk material, ceramics, metals, polymers, lubricants and oil additives etc. Test for research and development and quality control

## Material

Availablity

Value Unit

The information in this datasheet is provided for general purposes only and not meant to be a specific recommendation for any individual application. All values were determined under laboratory conditions.
